

KIDS ESCAPING DRUGS

FACE2FACE

Youth Vaping

Program

Our youth vaping presentation was created out of necessity due to the epidemic of vaping among teens. This dynamic and informative program speaks to middle and high school aged youth to help inform and identify the potential dangers and consequence of vaping.

Topics Covered

- Impact of cigarette smoking on previous generations
- Similarities between cigarette smoking and vaping
- Intentional marketing of vaping products to teens and young adults
- Health and safety concerns of vaping
- Impact of nicotine on the undeveloped, adolescent brain
- Options for teens who are addicted to vaping

FEEDBACK

"It is so important for students to receive accurate and up-to-date information about this increasingly popular and rapidly evolving trend, and how to get support if it is needed. We are so appreciative of our relationship with KED and for everything they do to support kids in the WNY community."

-Jessica Hutchings
